

RULES OF THE GAME

MULTI-GAME POKER PROGRESSIVE JACKPOT SIDE BET

If indicated at the table, players may place a multi-game poker progressive jackpot side bet in addition to their initial bet or, if allowed at the table, without making an initial bet. This bet must be made in accordance with the limits indicated at the table and be placed on the designated spot before the first hand is dealt. Thereafter, it cannot be withdrawn or changed. A multi-game poker progressive jackpot side bet wins if the five (5) cards considered in the game, as indicated below, make up a three-of-a-kind or higher-value hand, even if the player has surrendered or withdrawn the initial bet. Otherwise, the multi-game poker progressive jackpot side bet loses.

LET IT RIDE POKER

In Let It Ride poker, the five (5) cards considered for the purpose of the multi-game poker progressive jackpot side bet are the player's three (3) cards and the two (2) community cards.

ULTIMATE TEXAS HOLD'EM POKER

In Ultimate Texas Hold'Em poker, the five (5) cards considered for the purpose of the multi-game poker progressive jackpot side bet are the player's two (2) cards and the first three (3) community cards revealed by the dealer.

THREE CARD POKER

In three card poker, the five (5) cards considered for the purpose of the multi-game poker progressive jackpot side bet are the player's three (3) cards and the two (2) cards revealed on the table in the designated spot.

FLUSHES GONE WILD

In Flushes Gone Wild, the five (5) cards considered for the purpose of the multi-game poker progressive jackpot side bet are the player's five (5) cards.

THE PAYOUTS

A winning multi-game poker progressive jackpot side bet is paid in accordance to the

following payout table:

MULTI-GAME POKER PROGRESSIVE JACKPOT SIDE BET PAYOUTS*

*Only the highest combination is paid on a winning bet. In all cases, multi-game poker progressive jackpot side bets are collected by the dealer.

**The amount of the progressive jackpot displayed on-screen at the table is for information purposes only; in the event of a defect or discrepancy between the on-screen amount and the actual amount of the progressive jackpot as determined by the Société des casinos du Québec Inc.'s systems, the latter shall prevail.

In the event that more than one player who has made a multi-game poker progressive jackpot side bet gets a royal flush (of hearts, clubs or diamonds) in the same game, 20% will be deducted from the progressive jackpot, after which another 20% will be deducted from the new progressive jackpot amount, and so on, as many times as there are players who get this hand during the game. The amounts corresponding to each of these 20% shares are then added together and distributed equally among these players.

In the event that several players win with a royal flush in the same game, payouts for a royal flush of hearts, clubs or diamonds will be made first, followed by payouts for a royal flush of spades. For example, if a player has a royal flush of hearts while another has a royal flush of spades, and the progressive jackpot displayed at the table is \$100,000, the player with the royal flush of hearts will be entitled to 20% of the progressive jackpot (i.e. \$20,000), thereby reducing the progressive jackpot by that amount, and the player with the royal flush of spades will be entitled to 100% of the new progressive jackpot amount of \$80,000.

***In the event that a player who made a multi-game poker progressive jackpot side bet wins with a royal or straight flush, the other players at the table who also made multi-game poker progressive jackpot side bets will be entitled to the envy bonus corresponding to the winning hand. It is understood that the player who obtained the winning hand is not entitled to the envy bonus corresponding to their own hand. The

same game may give rise to several envy bonuses if several players who made multi-game poker progressive jackpot side bets at the same table get a royal or straight flush during the game.
