

RULES OF THE GAME

FIRE BET®

FIRE BET® SIDE BET

IN CRAPS

If indicated at the table, you may place a **Fire Bet®** side bet in addition to your bet. This bet must respect the minimum and maximum limits indicated at the table and be placed in the designated spot (within the limit of available spots on the table) before a shooter makes his first roll. A **Fire Bet®** side bet may not be withdrawn (or designated inactive) after the shooter establishes a point.

A **Fire Bet®** side bet wins and is paid in accordance with the payout table below if the following conditions are met:

- 1) The shooter establishes a “point” and hits the “point”, that is to say that his roll totals 4, 5, 6, 8, 9 or 10 (the “point”) and, in a subsequent roll, he again hits the point before a 7 is rolled.
- 2) Each point that is established and hit must be individual. If the shooter establishes a point and hits it several times, said point is counted as a single point established and hit.

Payout Table

<i>Number of points established and hit</i>	<i>Payout</i>
6 individual points	1,000 to 1
5 individual points	250 to 1
4 individual points	25 to 1

Note that only the highest payout ratio is paid on a winning bet.
